

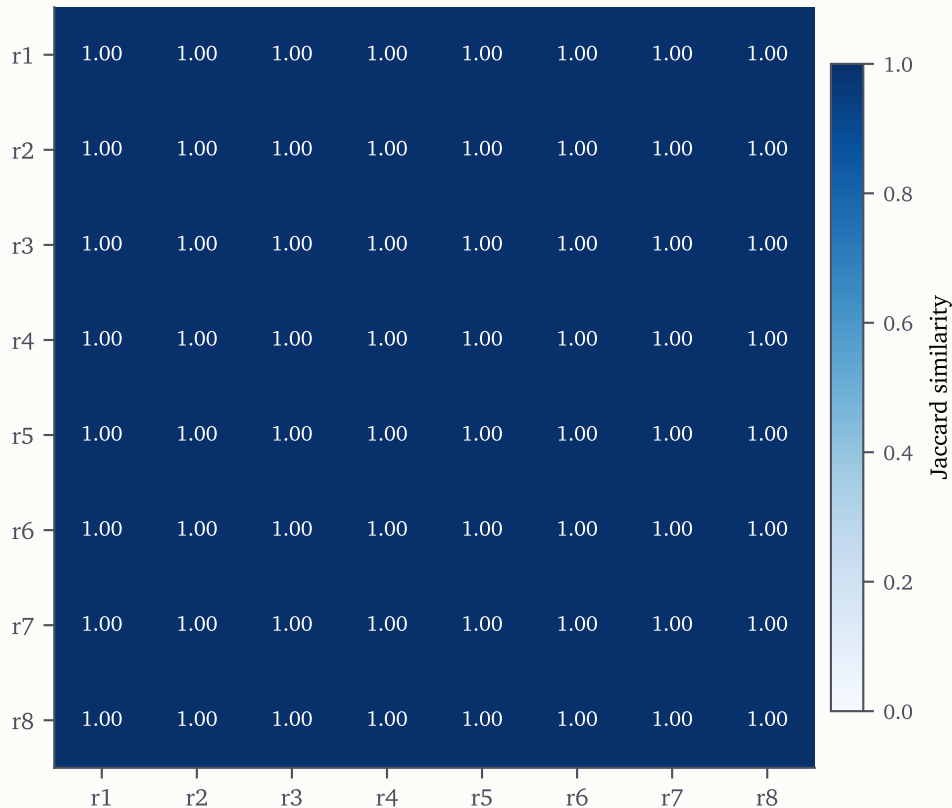

Figure 5, Vision Agent self-consistency on a fixed LID, N=8 runs
DYRK1A Compound 25014 LID image (348 KB). Mean runtime 5.1 ± 0.56 s per run; consensus restricted-atom set size = 3.

(a) Pairwise Jaccard, restricted atom-set (8×8; mean=1.00)

(b) Per-run: runtime + chemistry-validator drop count
